

# FAQ - How do I connect my Sky digital box in my the Main Living Space?

## how to wire

If you locate the **Skydigibox** in the Main Living Space you will be able to watch it in all Connected Rooms. The Satellite receiver is connected to the Room Media Socket and Main Media Socket. The signal from the Satellite receiver is returned to the TV Amp (via the return feed on the Main Media Socket), where it is distributed to the rest of the home. A connection diagram for this shown below.

You will only be able to view one channel at any time. To control the Satellite receiver and change channel from another Connected Room, you will need some extra kit such as a Sky remote handset and the ability to pass the infra-red signal back to the Satellite receiver. You can either use the Multi-room audio ceiling speakers, as they have built in infra-red passing built into them, or use a tvLINK to pass the infra-red signal over the coax cable. This is described in FAQ sheet FQ18-R1.

## connection diagram

### Main Living Space sockets

- 1 Connect the 'SAT' on the Room Media Socket to the 'DISH INPUT' on the Sky digi box.
- 2 Connect the 'TV' on the Room Media Socket to the 'AERIAL IN' on the Sky digi box.
- 3 Connect the 'RF-OUT 1' on the Sky digi box to the 'RF-IF' on the VCR / DVD Recorder. Connect the 'RF-OUT 2' on the VCR / DVD Recorder to the TV Return module on the Main Media Socket.
- 4 Connect the VCR / DVD Recorder to the Sky digi box using a Scart lead. Connect the TV to the Sky digi box using a Scart lead.
- 5 Connect the 'RF-OUT' on the VCR / DVD Recorder to the 'UHF' on the TV.
- 6 Connect the TV to the VCR / DVD Recorder using a Scart lead.
- 7 Connect the Sky digi box to a telephone socket. If you also need to use a phone at this location, please refer to our FAQ sheets.

You can watch your Satellite Receiver in other Connected Rooms - to control the Satellite Receiver from other rooms you will need some additional equipment (this is available from **digitalplumbers.com** and explained in an FAQ sheet FQ18-R1)

All equipment (included leads and cable for installation) can be bought from **digitalplumbers.com** - its easy.
